

Licence

Environmental Protection Act 1986, Part V

Licensee: Margaret River Winemakers Pty Ltd

Licence: L7819/2002/9

Registered office: 5 Harmans Mill Road
METRICUP WA 6280

ACN: 161 739 046

Premises address: Margaret River Winemakers
5 Harmans Mill Road
METRICUP WA 6280
Being Lot 112 on Plan 40318 as depicted in Schedule 1

Issue date: Thursday, 8 May 2014

Commencement date: Friday, 16 May 2014

Expiry date: Wednesday, 15 May 2019

Prescribed premises category

Schedule 1 of the *Environmental Protection Regulations 1987*

Category number	Category description	Category production or design capacity	Approved premises production or design capacity
25	Alcoholic beverage manufacturing: premises on which an alcoholic beverage is manufactured and from which liquid waste is or is to be discharged onto land or into water	350 kilolitres or more per year	1 400 kilolitres per annual period

Conditions

This Licence is subject to the conditions set out in the attached pages.

Officer delegated under section 20
of the *Environmental Protection Act 1986*

Introduction

This Introduction is not part of the Licence conditions.

DER's industry licensing role

The Department of Environment Regulation (DER) is a government department for the state of Western Australia in the portfolio of the Minister for Environment. DER's purpose is to protect and conserve the state's environment on behalf of the people of Western Australia.

DER has responsibilities under Part V of the *Environmental Protection Act 1986* (the Act) for the licensing of prescribed premises. Through this process DER works with the business owners, community, consultants, industry and other representatives to prevent, control and abate pollution and environmental harm to conserve and protect the environment. DER also monitor and audit compliance with works approvals and licence conditions, take enforcement action as appropriate and develop and implement licensing and industry regulation policy.

Licence requirements

This licence is issued under Part V of the Act. Conditions contained within the licence relate to the prevention, reduction or control of emissions and discharges to the environment and to the monitoring and reporting of them.

Where other statutory instruments impose obligations on the Premises/Licensee the intention is not to replicate them in the licence conditions. You should therefore ensure that you are aware of all your statutory obligations under the Act and any other statutory instrument. Legislation can be accessed through the State Law Publisher website using the following link:
<http://www.slp.wa.gov.au/legislation/statutes.nsf/default.html>

For your Premises relevant statutory instruments include but are not limited to obligations under the:

- *Environmental Protection (Unauthorised Discharges) Regulations 2004* – these Regulations make it an offence to discharge certain materials such as contaminated stormwater into the environment other than in the circumstances set out in the Regulations.
- *Environmental Protection (Controlled Waste) Regulations 2004* - these Regulations place obligations on you if you produce, accept, transport or dispose of controlled waste.
- *Environmental Protection (Noise) Regulations 1997* – these Regulations require noise emissions from the Premises to comply with the assigned noise levels set out in the Regulations.

You must comply with your licence. Non-compliance with your licence is an offence and strict penalties exist for those who do not comply.

Licence holders are also reminded of the requirements of section 53 of the Act which places restrictions on making certain changes to prescribed premises unless the changes are in accordance with a works approval, licence, closure notice or environmental protection notice.

Licence fees

If you have a licence that is issued for more than one year, you are required to pay an annual licence fee prior to the anniversary date of issue of your licence. Non payment of annual licence fees will result in your licence ceasing to have effect meaning that it will no longer be valid and you will need to apply for a new licence for your Premises.

Ministerial conditions

If your Premises has been assessed under Part IV of the Act you may have had conditions imposed by the Minister for Environment. You are required to comply with any conditions imposed by the Minister.

Premises description and Licence summary

Margaret River Winemakers Pty Ltd (MRW) is a contract winemaking facility located on Harmans Mill Road, Metricup, approximately 300 km south of Perth. The winery was established in 1998 and has a maximum crush capacity of approximately 1 500 tonnes/year of grapes. The licence was transferred to the current Licensee in January 2014.

The premises is located in a predominately rural area; with the nearest occupied properties being an adjacent dairy and winery. The nearest sensitive premises is a house located approximately 150 m south of the premises boundary (which is 450 m and 650 m south of the irrigation area and winery respectively). Depth to groundwater is 5.2 m and the nearest water course to the premises is a minor perennial stream which lies approximately 60 m to the east.

The winery processes grapes from several vineyards in the area, and retains a portion of product for their own label. The winery consists of a 2 ha vineyard, winery, cellar door, wastewater treatment system and a paddock irrigation area.

The wastewater treatment system includes solids screening, settlement, pH adjustment, aeration and clarification. Wastewater is pumped from one of two winery sumps to a rotary screen within the WWTS. Solids are directed to a sealed bin located under the screen and periodically removed to the marc storage pad prior to disposal offsite. Aeration takes place in two 60 kL and two 45 kL tanks and then overflows by gravity to a settlement tank. The water is directed to a multi compartment clarifier before entering the final irrigation tank for discharge.

Irrigation occurs via a series of lateral drippers in a designated vegetated irrigation area. The irrigation area consists of a 2 ha vineyard and approximately 1.5 ha grass/scrub area.

Marc, lees, screening solids and other organic wastes are stored on a bunded concrete hardstanding equipped with a sealed drainage sump. Collected leachate is manually pumped to the WWTS prior to discharge to the irrigation area.

This Licence is the successor to licence L7819/2002/8 and has been converted into REFIRE format. The licences and works approvals issued for the Premises since 11/02/2005 are:

Instrument log		
Instrument	Issued	Description
L7819/2002/3	11/02/2005	Licence re-issue
L7819/2002/4	09/02/2006	Licence re-issue
L7819/2002/5	08/02/2007	Licence re-issue (short term licence)
L7819/2002/6	04/04/2007	Licence re-issue
L7819/2002/7	15/05/2008	Licence re-issue
L7819/2002/8	14/05/2009	Licence re-issue

L7819/2002/8	15/12/2011	Licence amendment (add EIP conditions)
L7819/2002/8	23/01/2014	Licence transfer (to Margaret River Winemakers Pty Ltd)
L7819/2002/9	08/05/2014	Licence re-issue (conversion to REFIRE format)

Severance

It is the intent of these Licence conditions that they shall operate so that, if a condition or a part of a condition is beyond the power of this Licence to impose, or is otherwise *ultra vires* or invalid, that condition or part of a condition shall be severed and the remainder of these conditions shall nevertheless be valid to the extent that they are within the power of this Licence to impose and are not otherwise *ultra vires* or invalid.

END OF INTRODUCTION

Licence conditions

1 General

1.1 Interpretation

1.1.1 In the Licence, definitions from the *Environmental Protection Act 1986* apply unless the contrary intention appears.

1.1.2 For the purposes of this Licence, unless the contrary intention appears:

'Act' means the *Environmental Protection Act 1986*;

'annual period' means the inclusive period from 1 November until 31 October in the following year;

'AS/NZS 5667.1' means the Australian Standard AS/NZS 5667.1 *Water Quality – Sampling – Guidance of the Design of sampling programs, sampling techniques and the preservation and handling of samples*;

'AS/NZS 5667.10' means the Australian Standard AS/NZS 5667.10 *Water Quality – Sampling – Guidance on sampling of wastewaters*;

'averaging period' means the time over which a limit or target is measured or a monitoring result is obtained;

'code of practice for the storage and handling of dangerous goods' means document titled "Storage and handling of dangerous goods: Code of Practice" published by the Department of Mines and Petroleum, as amended from time to time;

'dangerous goods' has the meaning defined in the *Dangerous Goods Safety (Storage and Handling of Non-explosives) Regulations 2007*;

'CEO' means Chief Executive Officer of the Department of Environment Regulation;

'CEO' for the purpose of correspondence means:

Regional Leader, Industry Regulation, Greater Swan Region
Department of Environment Regulation
Bunbury Office
PO Box 1693
BUNBURY WA 6231
Telephone: (08) 9725 4300
Facsimile: (08) 9725 4351
Email: SWIRAdmin@dec.wa.gov.au;

'environmentally hazardous material' means material (either solid or liquid raw materials, materials in the process of manufacture, manufactured products, products used in the manufacturing process, by-products and waste) which if discharged into the environment from or within the premises may cause pollution or environmental harm. Note: Environmentally hazardous materials include dangerous goods where they are stored in quantities below placard quantities. The storage of dangerous goods above placard quantities is regulated by the Department of Mines and Petroleum;

'fugitive emissions' means all emissions not arising from point sources identified in Section 2.5;

'hardstand' means a surface with a permeability of 10^{-9} metres/second or less;

'leachate' means liquid released by or water that has percolated through waste and which contains some of its constituents;

'lees' means the material which accumulates in the bottom of grape juice or wine fermentation tanks;

'Licence' means this Licence numbered L7819/2002/9 and issued under the Act;

'Licensee' means the person or organisation named as Licensee on page 1 of the Licence;

'marc' means grape material (mainly skin, pulp and seeds) which is left over after grape crushing and pressing;

'NATA' means the National Association of Testing Authorities, Australia;

'NATA accredited' means in relation to the analysis of a sample that the laboratory is NATA accredited for the specified analysis at the time of the analysis;

'Premises' means the area defined in the Premises Map in Schedule 1 and listed as the Premises address on page 1 of the Licence;

'Schedule 1' means Schedule 1 of this Licence unless otherwise stated;

'Schedule 2' means Schedule 2 of this Licence unless otherwise stated;

'spot sample' means a discrete sample representative at the time and place at which the sample is taken;

'vintage' means the period of time during which the first and last grapes of the season are received for crushing; and

' μ S/cm' means microsiemens per centimetre.

1.1.3 Any reference to an Australian or other standard in the Licence means the relevant parts of the standard in force from time to time during the term of this Licence.

1.1.4 Any reference to a guideline or code of practice in the Licence means the version of that guideline or code of practice in force from time to time, and shall include any amendments or replacements to that guideline or code of practice made during the term of this Licence.

1.2 General conditions

1.2.1 Nothing in the Licence shall be taken to authorise any emission that is not mentioned in the Licence, where the emission amounts to:

- (a) pollution;
- (b) unreasonable emission;
- (c) discharge of waste in circumstances likely to cause pollution; or
- (d) being contrary to any written law.

1.2.2 The Licensee shall operate and maintain all pollution control and monitoring equipment to the manufacturer's specification or any relevant and effective internal management system.

1.2.3 The Licensee, except where storage is prescribed in section 1.3, shall ensure that environmentally hazardous substances are stored in accordance with the code of practice for the storage and handling of dangerous goods.

- 1.2.4 The Licensee shall immediately recover, or remove and dispose of spills of environmentally hazardous materials outside an engineered containment system.

1.3 Premises operation

- 1.3.1 The Licensee shall ensure that all wastewaters from alcoholic beverage manufacturing operations including wash down water, by-products wastewater and contaminated run-off are directed to a wastewater treatment system.
- 1.3.2 The Licensee shall ensure that waste material is only stored and/or treated within vessels or compounds provided with the infrastructure detailed in Table 1.3.2.

Table 1.3.2: Containment infrastructure		
Storage vessel or compound	Material	Infrastructure requirements
Winery effluent collection sumps	Wastewater	Concrete lined
Marc storage area	Marc, lees, screening solids, wastewater treatment sludge and other organic solid wastes	A bunded hardstand area with drainage system that can return leachate to the start of the treatment process.

- 1.3.3 The Licensee shall ensure that where wastes produced on the Premises are not taken off-site for lawful use or disposal, they are managed in accordance with the requirements in Table 1.3.3.

Table 1.3.3: Management of Waste		
Waste type	Disposal strategy	Operational requirements
Treated wastewater	Irrigation	<p>The Licensee shall ensure irrigation meets the following requirements:</p> <ul style="list-style-type: none">(a) irrigation does not occur in areas where the water table rises to within 1 m of the surface during the irrigation period;(b) irrigation does not occur within 100 m of a surface water body excluding dams within premises boundary;(c) irrigation is applied to the designated location identified in the map of emission points in Schedule 1;(d) no irrigation generated run-off, spray drift or discharge occurs beyond the boundary of the Premises;(e) treated wastewater is evenly distributed over the irrigation area;(f) no soil erosion occurs;(g) vegetation cover is maintained over the wastewater irrigation area; and(h) irrigation does not occur on land that is water logged.

- 1.3.4 The Licensee shall manage the wastewater treatment system such that:
- (a) overtopping of the wastewater treatment system does not occur;
 - (b) stormwater runoff is prevented from entering the wastewater treatment system;
 - (c) there is no discernible seepage loss from the wastewater treatment system; and
 - (d) vegetation and floating debris (emergent or otherwise) is prevented from growing or accumulating in the wastewater treatment system.

2 Emissions

2.1 General

- 2.1.1 The Licensee shall record and investigate the exceedance of any descriptive or numerical limit or target specified in any part of section 2 of this Licence.

2.2-2.4 Point source emissions to air, surface water and groundwater

There are no specified conditions relating to point source emissions to air, surface water or groundwater in this section.

2.5 Emissions to land

- 2.5.1 The Licensee shall ensure that where waste is emitted to land from the emission points in Table 2.5.1 and identified on the map of emission points in Schedule 1 it is done so in accordance with the conditions of this licence.

Table 2.5.1: Emissions to land

Emission point reference and location on Map of emission points	Emission point reference on Map of emission points	Description	Source including abatement
L1	Irrigation area	Discharge from irrigation tank to on-site irrigation area	Winery wastewater treated via wastewater treatment system

- 2.5.2 The Licensee shall not cause or allow emissions to land that do not meet the limits listed in Table 2.5.2.

Table 2.5.2: Emission limits to land

Emission point reference	Parameter	Limit (including units)	Averaging period
L1	pH	5.5 ≤ 8.5	Spot sample
	Load of total nitrogen	≤ 180 kg/ha	Annually
	Load of total phosphorus	≤ 20 kg/ha	
	Load of BOD	≤ 30 kg/ha	Daily

2.6-2.8 Fugitive emissions, odour and noise

There are no specified conditions relating to fugitive emissions, odour or noise in this section.

3 Monitoring

3.1 General monitoring

3.1.1 The licensee shall ensure that:

- (a) all water samples are collected and preserved in accordance with AS/NZS 5667.1;
- (b) all wastewater sampling is conducted in accordance with AS/NZS 5667.10; and
- (c) all laboratory samples are submitted to and tested by a laboratory with current NATA accreditation for the parameters being measured (unless indicated otherwise in the relevant table).

3.1.2 The Licensee shall record production or throughput data and any other process parameters relevant to any non-continuous or CEMS monitoring undertaken.

3.1.3 The Licensee shall ensure that all monitoring equipment used on the Premises to comply with the conditions of this Licence is calibrated in accordance with the manufacturer's specifications.

3.1.4 The Licensee shall, where the requirements for calibration cannot be practicably met, or a discrepancy exists in the interpretation of the requirements, bring these issues to the attention of the CEO accompanied with a report comprising details of any modifications to the methods.

3.2-3.4 Monitoring of point source emissions to air, surface water and groundwater

There are no specified conditions relating to monitoring of point source emissions to air, surface water or groundwater in this section.

3.5 Monitoring of emissions to land

3.5.1 The Licensee shall undertake the monitoring in Table 3.5.1 according to the specifications in that table.

Table 3.5.1: Monitoring of emissions to land					
Emission point reference	Monitoring point reference and location	Parameter	Units	Averaging Period	Frequency
L1	M1 - outflow from wastewater treatment system to irrigation area	Volumetric flow rate (cumulative)	L/s m ³ /day	Monthly	Continuous
		pH ¹	pH unit	Spot sample	Pre-vintage ² Peak-vintage ² Late vintage ² Post-vintage ² Non-vintage ³
		Electrical conductivity	µS/cm		
		Total nitrogen	mg/L		
		Total phosphorus			
		Total dissolved solids (TDS)			
		Total suspended solids (TSS)			
		Biological oxygen demand (BOD)			

Note 1: In-field non-NATA accredited analysis permitted.

Note 2: Samples shall be taken at least 30 days apart.

Note 3: Samples shall be taken twice during this period at least 3 months apart.

3.6-3.7 Monitoring of inputs and outputs and process monitoring

There are no specified conditions relating to monitoring of inputs and outputs or process monitoring in this section.

3.8-3.9 Ambient environmental quality and meteorological monitoring

There are no specified conditions relating to ambient environmental quality or meteorological monitoring in this section.

4 Improvements

4.1.1 The Licensee shall complete the improvements in Table 4.1.2 by the date of completion in Table 4.1.2.

4.1.2 The Licensee, for improvements not specifically requiring a written submission, shall write to the CEO stating whether and how the Licensee is compliant with the improvement within one week of the completion date specified in Table 4.1.2.

Table 4.1.2: Improvement program		
Improvement reference	Improvement	Date of completion
IR1	Submission of a revised Nutrient and Irrigation Management Plan (NIMP), including details of the wastewater treatment system and process	15/10/2014

5 Information

5.1 Records

5.1.1 All information and records required by the Licence shall:

- (a) be legible;
- (b) if amended, be amended in such a way that the original and subsequent amendments remain legible or are capable of retrieval;
- (c) except for records listed in 5.1.1(d) be retained for at least 6 years from the date the records were made or until the expiry of the Licence or any subsequent licence; and
- (d) for those following records, be retained until the expiry of the Licence and any subsequent licence:
 - (i) off-site environmental effects; or
 - (ii) matters which affect the condition of the land or waters.

5.1.2 The Licensee shall ensure that:

- (a) any person left in charge of the Premises is aware of the conditions of the Licence and has access at all times to the Licence or copies thereof; and
- (b) any person who performs tasks on the Premises is informed of all of the conditions of the Licence that relate to the tasks which that person is performing.

5.1.3 The Licensee shall complete an Annual Audit Compliance Report indicating the extent to which the Licensee has complied with the conditions of the Licence, and any previous licence issued under Part V of the Act for the Premises for the previous annual period.

5.1.4 The Licensee shall implement a complaints management system that as a minimum records the number and details of complaints received concerning the environmental impact of the activities undertaken at the Premises and any action taken in response to the complaint.

5.2 Reporting

- 5.2.1 The Licensee shall submit to the CEO an Annual Environmental Report within 60 calendar days after the end of the annual period. The report shall contain the information listed in Table 5.2.1 in the format or form specified in that table.

Table 5.2.1: Annual Environmental Report		
Condition or table (if relevant)	Parameter	Format or form ¹
-	Summary of any failure or malfunction of any pollution control equipment and any environmental incidents that have occurred during the annual period and any action taken	None specified
Table 3.5.1	Contaminant loading to land of parameters (total annual loading kg/ha/yr for nitrogen and phosphorus, average daily loading kg/ha/day for BOD)	None specified
	Volume of treated wastewater discharged to land	
	Monitoring of emissions to land	LR1
5.1.3	Compliance	Annual Audit Compliance Report (AACR)
5.1.4	Complaints summary	None specified

Note 1: Forms are in Schedule 2

- 5.2.2 The Licensee shall ensure that the Annual Environmental Report also contains:
- (a) any relevant process, production or operational data recorded under Condition 3.1.2;
 - (b) an assessment of the information contained within the report against previous monitoring results and Licence limits and/or targets; and
 - (c) a list of any original monitoring reports submitted to the Licensee from third parties for the annual period and make these reports available on request.

5.3 Notification

- 5.3.1 The Licensee shall ensure that the parameters listed in Table 5.3.1 are notified to the CEO in accordance with the notification requirements of the table.

Table 5.3.1: Notification requirements			
Condition or table (if relevant)	Parameter	Notification requirement ¹	Format or form ²
2.1.1	Breach of any limit specified in the Licence	Part A: As soon as practicable but no later than 5 pm of the next working day Part B: As soon as practicable	N1
-	Any failure or malfunction of any pollution control equipment or any incident, which has caused, is causing or may cause pollution		

Note 1: No notification requirement in the Licence shall negate the requirement to comply with s72 of the Act.

Note 2: Forms are in Schedule 2

Schedule 1: Maps

Premises map and map of emission points and storage locations

The Premises is shown in the map below. The pink line depicts the Premises boundary. The location of the emission point defined in Table 2.5.1 and storage area defined in Table 1.3.2 are shown below.

Schedule 2: Reporting & notification forms

These forms are provided for the proponent to report monitoring and other data required by the Licence. They can be requested in an electronic format.

ANNUAL AUDIT COMPLIANCE REPORT PROFORMA
