Dear [Redacted] Outside Scope

OAKFORD ORGANICS COMPOSTING FACILITY

I apologise for the delay in our response to your assessment report received on the 25th of July 2002 regarding waste disposal and trial products for the Oakford Organic Facility.

Outside Scope

Outside Scope

The Department of Environmental Protection (DEP) has conducted a review of the report authored by [Redacted], entitled "Assessment of Odour Levels from Oakford Organics Composting Facility, Oakford" relating to the odour associated with the use of [Redacted] Malting waste-water. As a result of the information provided in the assessment, the DEP does not have any objection to the use of the [Redacted] Malting waste-water within your operation.

Outside Scope

The application of granite dust and driller mud into your composting and soil blending processes, as requested in your facsimile, is also acceptable. However, in regards to your request for approval to incorporate grape marc and grease trap waste, a trial period would be required to assess any environmental impacts.

In order for the DEP to assess the suitability of a trial acceptance of grape marc and grease trap waste, you must submit a proposal describing the process of incorporation and how the potential environmental impacts, especially odour, will be controlled. In the event that a trial is approved, the trial will be monitored to assess any complaints that may be recorded regarding and the performance of the composting process (an inspection/s will be carried out by a DEP officer during the trial).

Please note that the above does not override any other statutory approvals that you are required obtain, such as any approvals from the Shire of Serpentine-Jarrahdale. You should check with the relevant authorities to ensure that your intended waste acceptance complies with their requirements.

If you have any queries or would like to discuss this further please contact [Redacted] at the Kwinana-Peel Office on [Redacted].

Outside Scope

Yours sincerely [Redacted] Outside Scope
