Hi ,

We should be careful not to replace plastic bags with rainforest paper bags that almost all paper bags are made from. On Google over 90% of paper bags falsely claim to be recycled. In some ways the rainforest paper bags are even worse as often made from illegally logged world heritage forest. The largest paper company doing this owns almost all paper manufacturing and retail brands in Australia. Reflex etc. Planet Ark copy paper is Reflex as well. The only real recycled paper bags are made by Ecocern Pty Ltd. There bags are only made from household and industrial paper scrap. Made in Australia and Australian owned.

Please see attachments and web site; ecocern.com.

Regards,

Michael Perroux.
