Subject: Stop the plastic

Dear Minister,

Please do not stop at lightweight plastic bags.

Please include degradable, biodegradable and compostable plastic bags as these have same destructive properties as the lightweight bags.

If any type of plastic bags aren't banned then there must be a realistic cost to the consumer no less than 50 cents per bag to offset the huge cost to environment.

With good education the public will cope, it might even help delay memory conditions with people needing to remember a shopping bag.

Please be strong with this incredibly important initiative.

Kind regards

Carolyn Oliff
