Application form: Works Approval / Licence / Renewal / Amendment / Registration

Part ∨ Division 3, *Environmental Protection Act 1986*Environmental Protection Regulations 1987

Part 1: Application type

INSTRUCTIONS:

- Completion of this form is a statutory requirement under s.54(1)(a) of the *Environmental Protection Act* 1986 (WA) (EP Act) for works approval applications; s.57(1)(a) for licence and licence renewal applications; s.59B(1)(a) for applications for an amendment; and under r.5B(2)(a) of the Environmental Protection Regulations 1987 (WA) (EP Regulations) for applications for registration of premises.
- . The instructions set out in this application form are general in nature.
- A reference to 'you' in these instructions is a reference to the applicant.
- The information provided to you by the Department of Water and Environmental Regulation (DWER) in relation to making applications does not constitute legal advice. DWER recommends that you obtain independent legal advice.
- Applicants seeking further information relating to requirements under the EP Act and/or EP Regulations
 are directed to the Parliamentary Counsel's Office website (www.legislation.wa.gov.au). Schedule 1 of the
 EP Regulations contains the categories of prescribed premises.
- For prescribed premises where activities fall within more than one category, ALL applicable categories
 must be identified. This applies for existing prescribed premises seeking renewal or amendment, as well
 as new prescribed premises.
- The application form must be completed with all relevant information attached. Attachments can be
 combined and submitted as one or more consolidated documents if desired, provided it is clear which
 section of the application form the information / attachments relate to. Where attachments are submitted
 separately, avoid duplicating information. Ensure that any cross-references between the application form
 and the supporting document(s) are accurate.
- If an application form has been submitted which is incomplete or materially incorrect, the Chief Executive
 Officer of DWER (CEO) will decline to deal with the application and advise the applicant accordingly.
- On completing this application form, please submit it to DWER in line with the instructions in Part 15 of the form.

1.1	This is an application for: [Select one option only. Your application may be returned if multiple options are selected.] under Part V, Division 3 of the EP Act. Please see the: • Guideline: Industry Regulation Guide	 □ Works approval □ Licence Existing registration number(s): [] Existing works approval number(s): [] ☑ Renewal Existing licence number: L8575/2011/1 		
	Procedure: Prescribed premises works approvals and licences for more information to assist in understanding DWER's regulatory regime for prescribed premises.	Amendment Number of the existing licence or works approval to be amended: [] Registration (works approval already obtained) Existing works approval number(s): []		
1.2	1.2 For a works approval amendment or licence amendment, are there less than 90 business days until the expiry of the existing works approval or licence? Only active instruments can be amended. Applications to amend a works approval or licence must be made 90 business days or more prior to the existing works approval or licence expiring to ensure there is adequate time to assess the amendment.			

Part 1: Application type

1.3 This application is for the following categories of prescribed premises:

(specify all prescribed premises category numbers)

- 6 Mine dewatering: premises on which water is extracted and discharged into the environment to allow mining of ore.
- 61A Solid Waste Facility: premises (other than a premises within category 67A) on which solid waste produced on other premises is stored, reprocessed, treated, or discharged onto land.
- 63 Class I inert landfill site: premises (other than clean fill premises) on which waste of a type permitted for disposal for this category of prescribed premises, in accordance with the Landfill Waste Classification and Waste Definitions 1996, is accepted for burial.
- 64 Class II or III putrescible landfill site: premises (other than clean fill premises) on which waste of a type permitted for disposal for this category of prescribed premises, in accordance with the Landfill Waste Classification and Waste Definitions 1996, is accepted for burial.

All activities that meet the definition of a prescribed premises as set out in Schedule 1 of the EP Regulations have been specified above (tick, if yes).

△ To the extent changed / required in relation to the amendment.

N/A Not required with application, but may be requested subsequently depending on DWER records.

"If required" Sections for applicants to determine.

Part 2: Applicant details

INSTRUCTIONS:

- The applicant (the occupier of the premises) must be an individual(s), a company, body corporate, or
 public authority, but not a partnership, trust, or joint-venture name. Applications made by or on behalf of
 business names or unincorporated associations will not be accepted.
- If applying as an individual, your full legal name must be provided.
- If applying as a company, body corporate, or public authority, the full legal entity name must be inserted.
- Australian Company Number's (ACN) must be provided for all companies or body corporates.
- DWER prefers to send all correspondence electronically via email. We request that you consent to
 receiving all correspondence relating to instruments and notices under Part V of the EP Act (Part V
 documents) electronically via email, by indicating your consent in Section 2.3.
- Companies or body corporates making an application must nominate an authorised representative from
 within their organisation. Proof of authorisation must be submitted with the application (see Section 2.10).
 If you are applying as an individual, you are the representative.
- Details of a contact person must be provided for DWER enquiries in relation to your application. This
 contact person can be a consultant if authorised to represent the applicant. Written evidence of this
 authorisation must be provided.
- Details of the occupier of the premises must be provided. One of the options must be selected and if you
 have been asked to specify, please provide details. For example, if 'lease holder' has been selected,
 please specify the type of lease (for example, pastoral lease, mining lease, or general lease) and provide a
 copy of the lease document(s). Note that contracts for sale of land will not be sufficient evidence of
 occupancy status.

2.1	Applicant name/s (full legal name/s):	Wyloo Kambalda	Wyloo Kambalda Northern Ops Pty Ltd

3.3	GPS (latitude and longitude) coordinates: GPS coordinates determined using the GDA 2020 (Geographic latitude / longitude) coordinate system and datum must be provided for all points around the proposed premises boundary, where the entirety of the cadastre (land parcel) or mining tenements are not used as the premises boundary.		1 - 2 - 3 - 4 - 5 - 6 - 7 - 8 - 9 -	of Lot 13 on Plan 489 Latitude -31.17046 -31.17059 -31.17239 -31.17243 -31.17323 -31.18116 -31.18116 -31.17581 -31.17578	Longitude 121.66866 121.68093 121.68090 121.68464 121.68672 121.68768 121.68097 121.67173 121.66817		
Attach	nments					N/A	Yes
3.4	Attachment 2: Premises map(s) You must provide as an attachment to this application form, labelled Attachment 2, either: 1. an aerial photograph, map, and site plan of sufficient scale showing the proposed prescribed premises boundary or 2. where available, a map of the proposed premises boundary and site plan as an ESRI shapefile (accepted file types include .dbf, .shp, .prj, and .shx) with the following properties (provided on a suitable portable digital storage device, if submitting application in hard copy form): • Geometry type: Polygon Shape				×		

Part 3: Premises details

- Coordinate system: GDA 2020 (Geographic latitude / longitude)
- Datum: GDA 2020 (Geocentric Datum of Australia 2020).

You must also provide a map or maps of the prescribed premises, clearly identifying and labelling:

- layout of key infrastructure and buildings, clearly labelled;
- the premises boundary (where the premises boundary does not align with the entirety of the cadastral boundary, identify the Lot Number for which the premises is part of);
- emission and discharge points (with precise GPS coordinates where available);
- monitoring points (with precise GPS coordinates where available);
- · sensitive receptors and land uses
- all areas proposed to be cleared (if applicable).

Maps must contain a north arrow, clearly marking the area in which the activities are carried out. The map or maps must be of reasonable clarity and have a visible scale.

Part 4: Proposed activities

INSTRUCTIONS:

- You must provide a description and the scope, size and scale of all prescribed activities of Schedule 1 to the EP Regulations including the maximum production or design capacity of each prescribed activity.
- If applying for a works approval or licence amendment involving the construction of new infrastructure, you must provide information on infrastructure to be constructed and how long construction is expected to take. You must confirm if commissioning is to occur and how long it will take.
- If applying for a works approval or licence amendment not involving the construction of new infrastructure, provide details of the proposed amendment.
- You must identify all emission sources on the premises map/s.
- You must also provide information on activities which directly relate to the prescribed premises category
 which have, or are likely to result in, an emission or discharge.
- If clearing activities are proposed provide a description and details. If a relevant exemption under Schedule 6 of the EP Act or r.5 of the Environmental Protection (Clearing of Native Vegetation) Regulations 2004 (WA) (Clearing Regulations) may apply, provide details.
- Note that in some cases, DWER may require that the clearing components of a works approval or licence (or amendment) application be submitted separately through the clearing permit application process.
 Refer to the <u>Procedure: Prescribed premises works approvals and licences</u> for further guidance.
- Please note that the requested information is critical to DWER's understanding of the proposed activities.
 The more accurate, specific, and complete the information provided in the application, the less
 uncertainty that DWER may identify in the application, therefore facilitating completion of the assessment
 in a more efficient and timely manner.

4.1 Prescribed premises infrastructure and equipment

In Table 4.1 (below), provide a list of all items of infrastructure and equipment within the boundary of the prescribed premises relevant to this application, and include the following details for each:

- relevant categories (if known) the categories of prescribed premises (as listed under Schedule 1
 of the EP Regulations) that relate to that infrastructure or equipment;
- **site plan reference** the location of that infrastructure or equipment (with reference to the site plan map or maps provided above in Section 3.4 and labelled as Attachment 2 e.g. use GPS coordinates or a clear description such as "labelled as [label on premises map] on Map A");
- is it critical containment infrastructure (CCI)? indicate if the identified infrastructure or
 equipment would be categorised as CCI. Refer to the <u>Guideline: Industry Regulation Guide to</u>
 <u>Licensing</u> for further information on CCI; and
- is environmental commissioning required? indicate if environmental commissioning is intended
 to be undertaken for that item of infrastructure or equipment. Refer to the <u>Guideline: Industry</u>
 <u>Regulation Guide to Licensing</u> for further information on environmental commissioning.

Add additional rows to Table 4.1 (below) as required.

Part 6: Other DWER approvals	
application, you must provide relevant details.	pprovals within DWER that may be relevant to this osal to the Environmental Protection Authority (EPA),
Pre-application scoping	
6.1 Have you had any pre-application / pre- referral / scoping meetings with DWER regarding any planned applications?	No ☐ Yes – provide details:
Environmental impact assessment (Part IV of the EP A	Act)
6.2 Have you referred or do you intend to refer the proposal to the EPA? Section 37B(1) of the EP Act defines a 'significant proposal' as "a proposal likely, if implemented, to have a significant effect on the environment". If DWER considers that the proposal in this application is likely to constitute a 'significant proposal', DWER is required under s.38(5) of the EP Act to refer the proposal to the EPA for assessment under Part IV, if such a referral has not already been made. If a relevant Ministerial Statement already exists, please provide the MS number in the space provided.	☐ Yes (referred) – reference (if known): [] ☐ Yes – intend to refer (proposal is a 'significant proposal') ☐ Yes – intend to refer (proposal will require a s.45C amendment to the current Ministerial Statement): MS [] ☐ No – a valid Ministerial Statement applies: MS [] ☑ No – not a 'significant proposal'
Clearing of native vegetation (Part V Division 2 of the	EP Act and Country Area Water Supply Act 1947)
 6.3 Have you applied or do you intend to apply for a native vegetation clearing permit? In accordance with the <u>Guideline: Industry Regulation Guide to Licensing</u> and <u>Procedure: Native vegetation clearing permits</u>, where clearing of native vegetation: • is exempt under Schedule 6 of the EP Act or the Environmental Protection (Clearing of Native Vegetation) Regulations 2004 (WA) (refer to <u>A quide to the exemptions and regulations for clearing native vegetation</u>) • is being assessed by a relevant authority which would lead to an exemption under Schedule 6 of the EP Act, or • has been referred under s.51DA of the EP Act and a determination made that a clearing permit is not required (refer to the <u>Guideline: Native vegetation clearing referrals</u>), the clearing will not be reassessed by DWER or be subject to any additional controls by DWER. If the proposed clearing action is to be assessed in accordance with, or under, an <u>Environment Protection and Biodiversity Conservation Act</u> (Cth) (EPBC Act) accredited process, such as the assessment bilateral agreement, the clearing permit application <u>Form Annex C7 – Assessment bilateral agreement</u> must be completed and attached to your clearing permit application. 	 Yes – clearing application reference (if known): CPS [] Yes – a valid EP Act clearing permit already applies: CPS [] No – this application includes clearing (please complete Sections 4.13 to 4.19 above) No – permit not required (no clearing of native vegetation) No – permit not required (clearing referral decision): CPS [] No – an exemption applies (explain why):

Part 6	: Other DWER approvals				
6.4	Have you applied or do you intend to apply for a Country Area Water Supply Act 1947 licence? If a clearing exemption applies in a Country Area Water Supply Act 1947 (CAWS Act) controlled catchment, or if compensation has previously been paid to retain the subject vegetation, a CAWS Act clearing licence is required. If yes, contact the relevant DWER regional office for a Form 1 Application for licence. Map of CAWS Act controlled catchments	☐ Yes – application reference (ii☐ No – a valid licence applies: [☐ No – licence not required]	
Water	licences and permits (Rights in Water and Irrig	ation Act 1914)

40.	Cition	 location
-1U:		1000081110011

10.1 Sensitive land uses

What is/are the distance(s) to the nearest sensitive land use(s)? A sensitive land use is a residence or other land use which may be affected by an emission or discharge associated with the proposed activities.

The Long Operation is located approximately 3km east of Kambalda, 50km south-south-east of Kalgoorlie and 2.7km by road from the BHP Nickel West Kambalda Nickel Concentrator, on the shores of Lake Lefroy. The nearest major highway is the Goldfields Highway, which connects Kambalda to Kalgoorlie-Boulder.

10.2 Nearby environmentally sensitive receptors and aspects

Identify in Table 10.2 (below):

- all instances of environmentally sensitive receptors that are known or suspected to be present within, or within close proximity to, the proposed prescribed premises boundary;
- the nature of the sensitive receptors (e.g. type of Threatened Ecological Community, species or threatened flora or fauna, etc.);
- their actual or approximate known distance and direction from the premises boundary (at the closest point/s); and
- if applicable, what measures have been or will be taken to ensure that sensitive receptors are not adversely impacted by any emissions or discharges from the premises.

Part 10: Siting and location

Refer to the Guideline: Environmental siting for further guidance.

Table 10.2: Nearby environmentally sensitive receptors and aspects

Type / classification	Description	Distance + direction to premises boundary	Proposed controls to prevent or mitigate adverse impacts (if applicable)
Environmentally Sensitive Areas ¹	Boorabbin National Park	>130km E	Not Applicable
Threatened Ecological Communities	Mount Belches BIF PEC (Priority 3)	>40km W	Not Applicable
Threatened and/or priority fauna	Dasyurus geoffroii (Chuditch, Western Quoll) - Vulnerable Opportunistic sighting 1974	690m N	Not Applicable
Threatened and/or priority flora	Cyathostemon divaricatus (P1)	450m E	Not Applicable
Aboriginal and other heritage sites ²	Kambalda Stone Arrangement (ACH-00003151)	>3km SE	Not Applicable
Public drinking water source areas ³	Broad Arrow Dam Catchment Area	>85km S	Not Applicable
Rivers, lakes, oceans, and other bodies of surface water, etc.	Lake Lefroy (High Potential GDE)	Within Boundary	Discharge volume and quality monitoring. Dewatering Discharge Assessment Report. Landfill stormwater diversion. Only approved wastes disposed in Landfill.
Acid sulfate soils	WA Coastal Area	>500km E	Not Applicable
Other	Kambalda Nature Reserve (R33300)	>7km E	Not Applicable
Other	Clearing Regulations Schedule 1 Area	Within Boundary	No clearing outside of mine footprint area.

¹ Environmentally Sensitive Areas are as declared under the *Environmental Protection (Environmentally Sensitive) Notice* 2005. Refer to DWER's website ("Environmentally Sensitive Areas") for further information.

10.3 Environmental siting context details

Provide further information including details on topography, climate, geology, soil type, hydrology, and hydrogeology at the premises.

² Refer to the <u>Department of Planning, Lands and Heritage website</u> for further information about Aboriginal heritage and other heritage sites.

³ Refer to <u>Water Quality Protection Note No.25: Land use compatibility tables for public drinking water source areas</u> for further information.

Part 10: Siting and location

The Prescribed Premises area lies within the Eastern Goldfields (COO3) subregion of the Coolgardie Bioregion which is described as gently undulating plains with a subdued relief, interrupted in the west with low hills and ridges of Archaean greenstones and in the east by a horst of Proterozoic basic granulite. The underlying geology is of gneisses and granites eroded into a flat plane covered with tertiary soils and with scattered exposures of bedrock. Calcareous earths are the dominant soil group and cover much of the plains and greenstone areas.

The climate of the Eastern Goldfields subregion is an arid to semi-arid climate with annual rainfall of approximately 200-300 mm. The site is in the Lefroy-Dundas groundwater sub area within the Goldfields Groundwater Management Area and groundwater generally ranges from 50,000 to 300,000 mg/L total dissolved solids (TDS).

The Long Operation is located along the shores of Lake Lefroy (discharge sites) one of the large number of saline depressions (internally drainage lakes) occurring within the Lefroy palaeodrainage catchment. Rainfall infiltration is the main source of aquifer recharge throughout the region with increasing salinities as Lake Lefroy is approached. Drainage is uncoordinated and directed towards the palaeodrainages of Lake Lefroy, Lake Zot and Lake Cowan. Discharge from the regional groundwater systems takes place by evaporation from salt lakes.

The site lies within the Lake Lefroy catchment, which is approximately 4,528km². Lake Lefroy is one of 30 major salt lakes located in the Coolgardie Bioregion, 11 of which have received, or are receiving, dewatering discharge from mining activities. Saline groundwater has been discharged to Lake Lefroy since 1965, prior to the establishment of the Long Operation.

Lake Lefroy appears to be a system in transition between an ephemeral lake and a salt pan, with continuing build-up of salts occurring via natural processes, as well as dewatering discharge. Lake Lefroy maintains a permanent salt crust ranging from 10cm on the margins to 30cm thick in floor depressions. While the surface of Lake Lefroy varies in bathymetry, the playa is generally of low relief, at approximately 286m above sea level.

Lake water, when present, is hypersaline and neutral to weakly alkaline with a typical West Australian Goldfields dominant sodium chloride chemical signature. Sediment input into the lake is considerable; particularly from the northern and western high relief etch surfaces where short streams commonly form alluvial fans where they enter the lake.

Attac	chments		N/A	Yes
10.4	Attachment 7: Siting and location	You must provide details and a map describing the siting and location of the premises, including identification of distances to sensitive land uses and/or any specified ecosystems.		×

	List title of additional document(s) attached:	Not Applicable			

Part 12: Category checklist(s)				
Attachments			N/A	Yes
12.1 Attachment 9: Category		DWER has developed category checklists to assist applicants with preparing their application.	⊠	
	checklist(s)	These checklists are available on <u>DWER's website</u> .		
		The relevant category-specific checklist(s) must be completed and included with the application, labelled as Attachment 9. If attaching multiple category checklists, label them 9A, 9B, etc.		
		Do not select "N/A" unless:		
		 a relevant category checklist is not yet published on DWER's website, or 		
		 the application is for an amendment that does not propose changes to the method of operation, or change the inputs, outputs, infrastructure, equipment, emissions, or discharges of / from the premises. 		
		Note that that a category checklist(s) may still be required for renewal applications. You will be advised in your renewal notification letter (sent approximately twelve months before the licence expiry date) if you are required to provide the information identified in a category checklist.		
		Where a category checklist is submitted, please specify which checklist(s) in the space below.		
	List title(s) of category checklists attached:	Instructions on the Solid Waste Landfill Site Checklist indicate apply to landfill sites that are associated with mining operation landfill premises (i.e. Category 89 premises).		

Cost of works: \$ Not Applicable

Part 13: Proposed fee calculation INSTRUCTIONS: Different fee units apply for different fee components. Fee units may also have different amounts depending on the period in which the calculation is made. Once DWER has confirmed that the application submitted meets the relevant requirements of the EP Act, you will be issued an invoice with instructions for paying your application fee. Further information on fees can be found in the Fact Sheet: Industry Regulation fees, and on DWER's website. 13.1 Only the relevant fee calculations are to be completed ☐ Section 13.3 for works approval applications as follows: Section 13.4 for licence / renewal [mark the box to indicate section s completed] applications ☐ Section 13.5 for registration applications ☐ Section 13.6 for amendment applications ☐ Section 13.7 for applications requiring clearing of native vegetation 13.2 All information and data used for the calculation of proposed fees has been provided in \boxtimes accordance with Section 13.8. 13.3 Proposed works approval fee Proposed works approval fee (see Schedule 3 of the EP Regulations) Fees relate to the cost of the works, including all capital costs (inclusive of GST) associated with the construction and establishment of the works proposed under the works approval application. This includes, for example, costs associated with earth works, hard stands, drainage, plant hire, equipment, processing plant, relocation of equipment and labour hire. Costs exclude: - the cost of land - the cost of buildings to be used for purposes unrelated to the purposes in respect of which the premises are, or will become, prescribed premises - costs for buildings unrelated to the prescribed premises activity or activities - consultancy fees relating to the works. Fee component Proposed fee

\$ Not Applicable

13.4 Proposed licence fee (new licences and licence renewals)

Detailed licence fee calculations

Part 1 Premises component (see r.5D and Part 1 of Schedule 4 of the EP Regulations)

The production or design capacity should be the maximum capacity of the premises. For most categories, the production or design capacity refers to an annual rate. The figure should be based on 24 hour operation for 365 days, unless there is another regulatory approval or technical reason that restricts operation.

The premises component fee applies to the category in Part 1, Schedule 4 incurring the higher or highest amount of fee units in accordance with r.5D(2) of the EP Regulations.

List all categories (insert additional rows as required). Use only the higher or highest amount of fee units to determine the Part 1 fee component.

Category	Production or design capacity	Fee units
Category 6	< 500,000 tonnes per year	
Category 61A	< 100 tonnes per year	
Category 63	< 500 tonnes per year	
Category 64	< 5,000 tonnes per year	

Part 2 Waste (see r.5D(1a)(b) and Part 2 of Schedule 4 of the EP Regulations)

Using the higher or highest amount of fee units, Part 1 component subtotal

If your premises includes one or more of the following categories specify any applicable Part 2 waste amounts. Do not include Part 3 waste components of these discharges in the below calculations.

Categories: 5, 6, 7, 8, 9, 12, 14, 44, 46, 53, 54A, 70, 80, or 85B

Part 2 waste means waste consisting of -

- (a) tailings; or
- (b) bitterns; or
- (c) water to allow mining of ore; or
- (d) flyash; or
- (e) waste water from a desalination plant.

If the premises does not fall into one of the categories listed above, or there are no applicable Part 2 waste amounts, the sub total for this section will be \$0.

Insert additional rows as required. Sum all Part 2 waste fees to determine the sub total.

Discharge quantity (tonnes/year)	Fee units	
Category 6 – < 500,000 tonnes per year		
Part 2 component subtatal	¢	

Part 3 Waste - Discharges to air, onto land, into waters (see Part 3 of Schedule 4 of the EP Regulations)

Choose the appropriate location of the discharge and enter the discharge amount(s) in the units specified in the EP Regulations. This should be the amount of waste expected to be discharged over the next 12 months, expressed in the units and averaging period applicable for that waste kind (for example, g/minute or kg/day). Amounts can be measured, calculated, or estimated and can be based on data acquired over the previous 12 months, but should be based on the maximum premises capacity and not the forecast operating hours.

Where there are discharges, all prescribed waste types must be considered in the fee calculation. If a specified waste type is not present in the discharge, this must be justified using an appropriate emission estimation technique (for example, sampling data, industry sector guidance notes, National Pollution Inventory guides and emission factors).

Summary – Proposed licence fee				
Part 1 Component		\$		
Part 2 Component		\$ <u></u>		
Part 3 Component		\$		
Total proposed licence fees:				
13.5 Prescribed fee for registration				
A fee of 24 units applies for an application for registration of premises, unless the occupier of the premises holds a licence in respect of the premises, in accordance with r.5B(2)(c) of the EP Regulations.				

13.6 Amendment fee (works approval or licence)

The fee prescribed for an application for an amendment to a works approval or licence is calculated in accordance with r.5BB(1)(a) of the EP Regulations:

- for a single category of prescribed premises to which the works approval or licence relates, by using the fee
 unit number corresponding to the prescribed premises category and relevant design capacity threshold in
 Schedule 4 Part 1 of the EP Regulations.
- for multiple categories of prescribed premises to which the works approval or licence relates, by using the highest fee unit number corresponding to the prescribed premises categories and design capacity threshold in Schedule 4 Part 1 of the EP Regulations.

Part 14: Commercially sensitive or confidential information

NOTE:

Information submitted as part of this application will be made publicly available. If you wish to submit commercially sensitive or confidential information, please identify the information in Attachment 11, and include a written statement of reasons why you request each item of information be kept confidential.

Information submitted later in the application process may also be made publicly available at DWER's discretion. For any commercially sensitive or confidential information, please follow the same process as described above.

DWER will take reasonable steps to protect genuinely confidential or commercially sensitive information. However, please note that DWER cannot commit to redacting all personal information from all supporting documents. You are advised to ensure that all personal information, including signatures, are removed from supporting documents prior to submitting them to the department. Please note that all submitted information may be the subject of an application for release under the *Freedom of Information Act 1992*.

All information which you would propose to be exempt from public disclosure has been	Attached	N/A
separately placed in a redacted version of the application form and its supporting documentation. Note that this is in addition to the unredacted version(s) provided to DWE for its assessment. Grounds for claiming exemption in accordance with Schedule 1 to the Freedom of Information Act 1992 must be specified in Attachment 11 (located at the end this form).		⊠

Part 15: Submission of application

Part 16: Declaration and signature

General

I / We confirm and acknowledge that:

- the information contained in this application is true and correct;
- I / we have legal authority to sign on behalf of the applicant (where authorisation provided);
- I / we have not altered the requirements and instructions set out in this application form;
- I / we have provided a valid email address in Section 2.3 for receipt of correspondence electronically via email
 from DWER in relation to this application;
- that successful delivery to my / our server constitutes receipt of correspondence sent electronically via email from DWER in relation to this application; and
- I / we have provided a valid postal and/or business address in Section 2.4 for the service of all Part V
 documents.
- giving or causing to be given information that to my knowledge is false or misleading is an offence under s.112 of the EP Act and may incur a penalty of up to \$100,000.

Publication

I / We confirm and acknowledge:

- this application (including all attachments apart from the sections identified in Attachment 11) is a public document and may be published;
- marine surveys provided in accordance with Part 5 will be published and used, for the purposes of the IMSA project, in accordance with your declaration made in the Metadata and Licensing Statement;
- all necessary consents for the publication of information have been obtained from third parties;
- information considered exempt from public disclosure has been noted by redaction of a separately provided copy of the completed application form and its supporting documentation (in accordance with Part 14), with reasons as to why the information should be exempt in accordance with the grounds specified in Schedule 1 to the *Freedom of Information Act 1992* (WA) being provided in Attachment 11;
- subsequent information provided in relation to this application will be a public document and may be published
 unless written notice has been given to DWER by the applicant, at the time the information is provided, claiming
 that the information is considered exempt from public disclosure; and
- the decision to not publish information will be at the discretion of the CEO of DWER and will be made consistently with the provisions of the Freedom of Information Act 1992 (WA).
