Application form: Works Approval / Licence / Renewal / Amendment / Registration

Part V Division 3. Environmental Protection Act 1986 Environmental Protection Regulations 1987

Part 1: Application type

INSTRUCTIONS:

- Completion of this form is a statutory requirement under s.54(1)(a) of the Environmental Protection Act 1986 (WA) (EP Act) for works approval applications; s.57(1)(a) for licence and licence renewal applications; s.59B(1)(a) for applications for an amendment; and under r.5B(2)(a) of the Environmental Protection Regulations 1987 (WA) (EP Regulations) for applications for registration of premises.
- The instructions set out in this application form are general in nature.
- A reference to 'you' in these instructions is a reference to the applicant.
- The information provided to you by the Department of Water and Environmental Regulation (DWER) in relation to making applications does not constitute legal advice. DWER recommends that you obtain independent legal advice.
- Applicants seeking further information relating to requirements under the EP Act and/or EP Regulations are directed to the Parliamentary Counsel's Office website (www.legislation.wa.gov.au). Schedule 1 of the EP Regulations contains the categories of prescribed premises.
- For prescribed premises where activities fall within more than one category, ALL applicable categories must be identified. This applies for existing prescribed premises seeking renewal or amendment, as well as new prescribed premises.
- The application form must be completed with all relevant information attached. Attachments can be combined and submitted as one or more consolidated documents if desired, provided it is clear which section of the application form the information / attachments relate to. Where attachments are submitted separately, avoid duplicating information. Ensure that any cross-references between the application form and the supporting document(s) are accurate.
- If an application form has been submitted which is incomplete or materially incorrect, the Chief Executive Officer of DWER (CEO) will decline to deal with the application and advise the applicant accordingly.
- On completing this application form, please submit it to DWER in line with the instructions in Part 15 of

tn	e form.				
1.1 This is an application for: [Select one option only. Your application may be returned if multiple options are selected.] under Part V, Division 3 of the EP Act. Please see the: • Guideline. Part 2: Applicant details

INSTRUCTIONS:

- The applicant (the occupier of the premises) must be an individual(s), a company, body corporate, or
 public authority, but not a partnership, trust, or joint-venture name. Applications made by or on behalf of
 business names or unincorporated associations will not be accepted.
- If applying as an individual, your full legal name must be provided.
- If applying as a company, body corporate, or public authority, the full legal entity name must be inserted.
- Australian Company Number's (ACN) must be provided for all companies or body corporates.
- DWER prefers to send all correspondence electronically via email. We request that you consent to
 receiving all correspondence relating to instruments and notices under Part V of the EP Act (Part V
 documents) electronically via email, by indicating your consent in Section 2.3.
- Companies or body corporates making an application must nominate an authorised representative from within their organisation. Proof of authorisation must be submitted with the application (see Section 2.10).
 If you are applying as an individual, you are the representative.
- Details of a contact person must be provided for DWER enquiries in relation to your application. This
 contact person can be a consultant if authorised to represent the applicant. Written evidence of this
 authorisation must be provided.
- Details of the occupier of the premises must be provided. One of the options must be selected and if you
 have been asked to specify, please provide details. For example, if 'lease holder' has been selected,
 please specify the type of lease (for example, pastoral lease, mining lease, or general lease) and provide a
 copy of the lease document(s). Note that contracts for sale of land will not be sufficient evidence of
 occupancy status.

Part 4: Proposed activities

INSTRUCTIONS:

- You must provide a description and the scope, size and scale of all prescribed activities of Schedule 1 to the EP Regulations including the maximum production or design capacity of each prescribed activity.
- If applying for a works approval or licence amendment involving the construction of new infrastructure, you must provide information on infrastructure to be constructed and how long construction is expected to take. You must confirm if commissioning is to occur and how long it will take.
- If applying for a works approval or licence amendment not involving the construction of new infrastructure, provide details of the proposed amendment.
- · You must identify all emission sources on the premises map/s.
- You must also provide information on activities which directly relate to the prescribed premises category
 which have, or are likely to result in, an emission or discharge.
- If clearing activities are proposed provide a description and details. If a relevant exemption under Schedule 6 of the EP Act or r.5 of the Environmental Protection (Clearing of Native Vegetation) Regulations 2004 (WA) (Clearing Regulations) may apply, provide details.
- Note that in some cases, DWER may require that the clearing components of a works approval or licence (or amendment) application be submitted separately through the clearing permit application process.
 Refer to the <u>Procedure: Prescribed premises works approvals and licences</u> for further guidance.
- Please note that the requested information is critical to DWER's understanding of the proposed activities.
 The more accurate, specific, and complete the information provided in the application, the less uncertainty that DWER may identify in the application, therefore facilitating completion of the assessment in a more efficient and timely manner.

4.1 Prescribed premises infrastructure and equipment

In Table 4.1 (below), provide a list of all items of infrastructure and equipment within the boundary of the prescribed premises relevant to this application, and include the following details for each.

- relevant categories (if known) the categories of prescribed premises (as listed under Schedule 1
 of the EP Regulations) that relate to that infrastructure or equipment.
- site plan reference the location of that infrastructure or equipment (with reference to the site plan
 map or maps provided above in Section 3.4 and labelled as Attachment 2 e.g. use GPS
 coordinates or a clear description such as "labelled as [label on premises map] on Map A");
- is it critical containment infrastructure (CCI)? indicate if the identified infrastructure or equipment would be categorised as CCI. Refer to the <u>Guideline: Industry Regulation Guide to</u> <u>Licensing</u> for further information on CCI; and
- is environmental commissioning required? indicate if environmental commissioning is intended
 to be undertaken for that item of infrastructure or equipment. Refer to the <u>Guideline Industry</u>
 Regulation Guide to Licensing for further information on environmental commissioning.

Add additional rows to Table 4.1 (below) as required.

Part 4: Proposed activities

4.2 Detailed description of proposed activities or proposed changes (if an amendment):

You must provide details of proposed activities relevant to this application within the boundary of the prescribed premises, identifying:

- scope, size, and scale of the project, including details as to production or design capacity (and/or frequency, if applicable);
- · key infrastructure and equipment,
- description of processes or operations (a process flow chart may be included as an attachment);
- · emission / discharge points,
- locations of waste storage or disposal
- · activities occurring during construction, environmental commissioning, and operation (if applicable)

If assessment and imposition of conditions to allow environmental commissioning to be undertaken are requested, please provide an environmental commissioning plan as Attachment 3A (see 4.11 below). Additional information relating to the proposed activities may be included in Attachment 3B (see 4.12 below).

Construction activities (if applicable):

Part 4: Proposed activities

1. 8 Series Inpit TSF and Pipelines

Tailings will be transported from the processing plant via the existing 19 Series Inpit TSF, to the 8 Series Inpit TSF via large diameter steel or high density polyethylene (HDPE) pipeline. An emergency deposition pipeline, that will also be utilised during the top up phase, will tie into the existing 17 Series Inpit disposition line slightly to the north. Pipeline corridors will have a nominal width of 10 m (comprising a 5 m wide pipeline bunding corridor and an access track of 5 m width). All pipelines will have telemetry and be installed in accordance with Australian Standards. Containment bunds along both sides of the pipeline corridor will have a minimum height of 0.6 m.

The containment bunds will be constructed with suitable mine waste. No moisture conditioning and testing are required for this fill material. The access track will be constructed with traffic compacted suitable mine waste (nominal 0.3 m thick) (Tetra Tech Coffey, 2024).

Additional detail including the general arrangement and typical section of the pipeline bunding corridor and access track around the inpit TSF is provided in Attachment 8B – TSF Design Report.

2. Water Recovery

Supernatent water liberated from tailings slurry will be recovered by dedicated pumps situated at locations along access ramps western end of the TSF. Initially water will be decanted at relatively lower points of these access ramps, and as the tailings level increases, the water recovery points will move upward along the access ramps.

The tailings deposition plan has been designed to position the supernatant water pond adjacent to the access ramp into the TSF, from where the decant pump will be situated. The supernatant pond is expected develop progressively at the opposite side of the discharge point(s).

As tailings and water levels rise within the TSF, the supernatant water pond will move up the access ramp, with the decant pump to be withdrawn up the ramp. The ramp will provide access to the decant pump for operation and maintenance purposes. Water recovered from the facility will be returned to the processing plant via the pipeline corridor for re-use. Water shall not be allowed to accumulate in the pit (Tetra Tech Coffey, 2024).

3. Monitoring Bores

Seepage indication bores shall be installed on the perimeter of proposed 8 Series Inpit TSF. Previous bore installations (at existing inpit TSFs) have been 100 mm in diameter to enable the bores to be equipped for seepage recovery. However, recent advice from the Department of Water and Environmental Regulation (DWER) relating to the 17 Series inpit TSF is that "monitoring bores should be kept separate from seepage recovery to ensure continuity and reliability of monitoring data. Conversion of monitoring bores into seepage recovery bores will therefore not be accepted."

Seven new seepage indication bores of 50 mm shall be constructed at a distance where they will not be unreasonably impacted by seepage due to proximity. This spacing also allows for the establishment of a purpose-built 100 mm seepage recovery bore between the seepage indication bore and inpit TSF, if required. There are also multiple existing seepage indication bores located in the vicinity for the purpose of monitoring the 804 and 17 Series Inpit TSFs, located adjacent to the proposed 8 Series Inpit TSF. A map of the proposed seepage indication bores is provided in Attachment 2 – Premises Maps.

Seepage indication bores shall be strategically located to ensure spatial coverage while also targeting the main structural features identified in the geological architecture reports, which may serve as primary pathways for seepage migration (Tetra Tech Coffey, 2024).

Baseline monitoring shall be conducted at the seepage indication bores prior to commencement of tailings deposition into the proposed inpit TSF. Ongoing quarterly groundwater monitoring will then be undertaken in accordance with the monitoring requirements specified in L7276/1996/12.

Environmental commissioning activities (if applicable):

Refer to the Guideline: Industry Regulation Guide to Licensing for further guidance.

No environmental commissioning activities are proposed.

Time limited operations activities (if applicable):

Different elements of the premises may require time limited operations to commence at different times. In these circumstances, please specify the infrastructure and/or equipment for which time limited operations authorisation is being applied for.

If time limited operations are expected to differ from future licensed operations, specify how and why this would be the case.

Refer to the Guideline: Industry Regulation Guide to Licensing for further guidance.

Part 4	: Proposed activities						
	To streamline the approvals process and enable proposed activities to MMO requests that the prescribed activities are authorised as Time Limite is requested to be set at 180 calendar days to allow for an assessment of that the planned TLO activities will not be different from future licensed of	ed Operations (TI of the Licence Ap	O) The T	LO period

Part 6: Other DWER approvals							
application, you must provide relevant details.	If you have applied, or intend to apply, for other approvals within DWER that may be relevant to this application, you must provide relevant details. If you have referred, or intend to refer, your proposal to the Environmental Protection Authority (EPA), you must provide the requested details.						
Pre-application scoping							
6.1 Have you had any pre-application / pre- referral / scoping meetings with DWER regarding any planned applications?	☐ Yes – provide details:						
Environmental impact assessment (Part IV of the EP	Act)						
6.2 Have you referred or do you intend to refer the proposal to the EPA? Section 37B(1) of the EP Act defines a 'significant proposal' as 'a proposal likely, if implemented, to have a significant effect on the environment". If DWER considers that the proposal in this application is likely to constitute a 'significant proposal', DWER is required under s.38(5) of the EP Act to refer the proposal to the EPA for assessment under Part IV, if such a referral has not already been made. If a relevant Ministerial Statement already exists, please provide the MS number in the space provided.	□ Yes (referred) – reference (if known): [] □ Yes – intend to refer (proposal is a 'significant proposal') □ Yes – intend to refer (proposal will require a s.45C amendment to the current Ministerial Statement): MS [] □ No – a valid Ministerial Statement applies: MS [444 & 506] □ No – not a 'significant proposal'						
Clearing of native vegetation (Part V Division 2 of the	EP Act and Country Area Water Supply Act 1947)						
6.3 Have you applied or do you intend to apply for a native vegetation clearing permit? In accordance with the Guideline: Industry Regulation Guide to Licensing and Procedure: Native vegetation clearing permits, where clearing of native vegetation: • is exempt under Schedule 6 of the EP Act or the Environmental Protection (Clearing of Native Vegetation) Regulations 2004 (WA) (refer to A guide to the exemptions and regulations for clearing native vegetation) • is being assessed by a relevant authority which would lead to an exemption under Schedule 6 of the EP Act and a determination made that a clearing permit is not required (refer to the Guideline: Native vegetation clearing referrals), the clearing will not be reassessed by DWER or be subject to any additional controls by DWER. If the proposed clearing action is to be assessed in accordance with, or under, an Environment Protection and Biodiversity Conservation Act (Cth) (EPBC Act) accredited process, such as the assessment bilateral agreement, the clearing permit application Form Annex C7 — Assessment bilateral agreement must be completed and attached to your clearing permit application.	Yes – clearing application reference (if known): CPS [] Yes – a valid EP Act clearing permit already applies. CPS [] No – this application includes clearing (please complete Sections 4.13 to 4.19 above) No – permit not required (no clearing of native vegetation) No – permit not required (clearing referral decision): CPS [] No – an exemption applies (explain why): Clearing was assessed under section 40 as part of a proposal referred under section 38 of Part IV of the EP Act.						

6.4	Have you applied or do you intend to apply	☐ Yes – application referen	ce /if known	0-1	1
	for a Country Area Water Supply Act 1947 licence?	□ No – a valid licence appli)-1]	1
	If a clearing exemption applies in a Country Area Water Supply Act 1947 (CAWS Act) controlled	1922	200 m

Part 9: Emissions, discharges, and waste

Specify, if yes:

Solid waste types must be described with reference to Landfill Waste Classification and Waste Definitions 1996 (as amended from time to time) and the Environmental Protection (Controlled Waste) Regulations 2004 (Controlled Waste Regulations).

Liquid waste types must be described with reference to the Controlled Waste Regulations.

For further guidance on the definition of waste, refer to Fact Sheet: Assessing whether material is waste.

Detail must be provided on storage type (for example, hardstand and containment infrastructure), capacity, likely storage volumes, and containment features (for example, lining and bunding).

Additional rows may be added as required and/or further information may be included as an attachment (see Section 9.4).

Table 9.2 Waste types

	Waste type	Quantity (e.g. tonnes, litres, cubic metres)	Waste activity infrastructure (including specifications)	Monitoring (if applicable)	Location (on site layout plan - see 3.4)
1.	Tailings seepage	17,280,000 t	8 Series Inpit TSF – containment infrastructure	Visual inspection carried out 12 hourly during operations. 9.4	Attachment 6B: Waste acceptance (if required)	If required, further information for Section 9.2 has been included as an attachment labelled Attachment 6B.	×	

Part 10: Siting and location

10.1 Sensitive land uses

What is/are the distance(s) to the nearest sensitive land use(s)? A sensitive land use is a residence or other land use which may be affected by an emission or discharge associated with the proposed activities.

The premises is situated on Minara and Glenorn pastoral leases, both of which are held by Minara Pastoral Holdings Pty Ltd, through a lease and sub-lease respectively.

Mount Margaret Community located 30 km east of the premises.

Leonora Township located 50 km west of the premises. Laverton Township located 55 km east of the premises.

10.2 Nearby environmentally sensitive receptors and aspects

Identify in Table 10.2 (below)

- all instances of environmentally sensitive receptors that are known or suspected to be present within, or within close proximity to, the proposed prescribed premises boundary,
- the nature of the sensitive receptors (e.g. type of Threatened Ecological Community, species or threatened flora or fauna, etc.);
- their actual or approximate known distance and direction from the premises boundary (at the closest point/s); and
- if applicable, what measures have been or will be taken to ensure that sensitive receptors are not
 adversely impacted by any emissions or discharges from the premises.

² Copies / details of any other relevant approvals (e.g. from the Department of Health) must be provided where applicable.

³ Wastes derived from the storage, handling, and use of dangerous goods may be considered hazardous and may need to be handled with the same precautions. Please refer to the Department of Mines, Industry Regulation and Safety's Dangerous Goods Safety information sheet for more information.

Part 10: Siting and location

Refer to the Guideline. Environmental siting for further guidance.

Table 10.2: Nearby environmentally sensitive receptors and aspects

Type / classification	Description	Distance + direction to premises boundary	Proposed controls to prevent or mitigate adverse impacts (if applicable)
Environmentally Sensitive Areas ¹	Nil		
Threatened Ecological Communities	Nil		
Threatened and/or priority fauna	Malleefowl previously record within proximity to MMO. No suitable breeding habitat within premises boundary.	General area	Nif
Threatened and/or priority flora	Nil		
Aboriginal and other heritage sites ²	Aboriginal site	50 m N of facility	Heritage site demarcated. No unauthorised access. Ongoing consultation with Aboriginal representatives.
Public drinking water source areas ³	Leonora Water Reserve Laverton Water Reserve and Catchment Area	40 km W of premises 45 km NE of premises	Nii
Rivers, lakes, oceans, and other bodies of surface water, etc.	Nil		
Acid sulfate soils	Nil		
Other			

¹ Environmentally Sensitive Areas are as declared under the *Environmental Protection (Environmentally Sensitive) Notice* 2005. Refer to DWER's website ("Environmentally Sensitive Areas") for further information.

10.3 Environmental siting context details

Provide further information including details on topography, climate, geology, soil type, hydrology, and hydrogeology at the premises.

See attachment 7.

Attach	Attachments		N/A	Yes
10.4	Attachment 7: Siting and location	You must provide details and a map describing the siting and location of the premises; including identification of distances to sensitive land uses and/or any specified ecosystems.		×

Attach	nments		No	Yes
11.1	Attachment 8: Additional information	Applicants seeking to submit further information may include information labelled Attachment 8. If submitting multiple additional attachments, label them 8A, 8B, etc.		×
	submitted	Where additional documentation is submitted, please specify the name of documents below.		

² Refer to the <u>Department of Planning. Lands and Heritage website</u> for further information about Aboriginal heritage and other heritage sites:

³ Refer to Water Quality Protection Note No.25. Land use compatibility tables for public drinking water source areas for further information.

Part 11: Submission of any other relevant information					
List title of additional document(s) attached:	Attachment 8A: Conceptual Site Model

Cost of v	works: \$		\$	

13.4 Proposed licence fee (new licences and licence renewals)

Detailed licence fee calculations

Part 1 Premises component (see r.5D and Part 1 of Schedule 4 of the EP Regulations)

The production or design capacity should be the maximum capacity of the premises. For most categories, the production or design capacity refers to an annual rate. The figure should be based on 24 hour operation for 365 days, unless there is another regulatory approval or technical reason that restricts operation.

The premises component fee applies to the category in Part 1, Schedule 4 incurring the higher or highest amount of fee units in accordance with r 5D(2) of the EP Regulations.

List all categories (insert additional rows as required). Use only the higher or highest amount of fee units to determine the Part 1 fee component.

Category	Production or design capacity	Fee units	
	·		
Using the higher or high	est amount of fee units. Part 1 component subtota	al \$	

Part 2 Waste (see r.5D(1a)(b) and Part 2 of Schedule 4 of the EP Regulations)

If your premises includes one or more of the following categories specify any applicable Part 2 waste amounts. Do not include Part 3 waste components of these discharges in the below calculations.

Categories: 5, 6, 7, 8, 9, 12, 14, 44, 46, 53, 54A, 70, 80, or 85B

Part 2 waste means waste consisting of -

- (a) tailings; or
- (b) bitterns; or
- (c) water to allow mining of ore, or
- (d) flyash; or
- (e) waste water from a desalination plant,

If the premises does not fall into one of the categories listed above, or there are no applicable Part 2 waste amounts, the sub total for this section will be \$0.

Insert additional rows as required. Sum all Part 2 waste fees to determine the sub total.

Fee units

Part 2 component subtotal

\$

Part 3 Waste - Discharges to air, onto land, into waters (see Part 3 of Schedule 4 of the EP Regulations)

Choose the appropriate location of the discharge and enter the discharge amount(s) in the units specified in the EP Regulations. This should be the amount of waste expected to be discharged over the next 12 months, expressed in the units and averaging period applicable for that waste kind (for example, g/minute or kg/day). Amounts can be measured, calculated, or estimated and can be based on data acquired over the previous 12 months, but should be based on the maximum premises capacity and not the forecast operating hours.

Where there are discharges, all prescribed waste types must be considered in the fee calculation. If a specified waste type is not present in the discharge, this must be justified using an appropriate emission estimation technique (for example, sampling data, industry sector guidance notes, National Pollution Inventory guides and emission factors).

Discharges to air Discharge ral (g/min)	e Discharges to air	Discharge rate (g/min)
Carbon monoxide	Nickel	
Oxides of nitrogen	Vanadium	
Sulphur oxides	Zinc	
Particulates (Total PM)	Vinyl chloride

Total proposed licence fees:		\$
13.5 Prescribed fee for registration		
A fee of 24 units applies for an application fo occupier of the premises holds a licence in reaccordance with r.5B(2)(c) of the EP Regulation	espect of the premises, in	ick to acknowledge)

13.6	Amendment fee	(works approva	or licence)
------	---------------	----------------	-------------

The fee prescribed for an application for an amendment to a works approval or licence is calculated in accordance with r.5BB(1)(a) of the EP Regulations:

- for a single category of prescribed premises to which the works approval or licence relates, by using the fee
 unit number corresponding to the prescribed premises category and relevant design capacity threshold in
 Schedule 4 Part 1 of the EP Regulations.
- for multiple categories of prescribed premises to which the works approval or licence relates, by using the
 highest fee unit number corresponding to the prescribed premises categories and design capacity threshold
 in Schedule 4 Part 1 of the EP Regulations.

Part 14: Commercially sensitive or confidential information

NOTE:

Information submitted as part of this application will be made publicly available. If you wish to submit commercially sensitive or confidential information, please identify the information in Attachment 11, and include a written statement of reasons why you request each item of information be kept confidential.

Information submitted later in the application process may also be made publicly available at DWER's discretion. For any commercially sensitive or confidential information, please follow the same process as described above.

DWER will take reasonable steps to protect genuinely confidential or commercially sensitive information. However, please note that DWER cannot commit to redacting all personal information from all supporting documents. You are advised to ensure that all personal information, including signatures, are removed from supporting documents prior to submitting them to the department. Please note that all submitted information may be the subject of an application for release under the *Freedom of Information Act 1992*.

All information which you would propose to be exempt from public disclosure has been	Attached	N/A
separately placed in a redacted version of the application form and its supporting documentation. Note that this is in addition to the unredacted version(s) provided to DWER for its assessment. Grounds for claiming exemption in accordance with Schedule 1 to the Freedom of Information Act 1992 must be specified in Attachment 11 (located at the end of this form).		

Part 15: Submission of application	
INSTRUCTIONS: Check one of the boxes below to nominate how you will submit your application. Files larger than 50MB cannot be received via email by DWER. Files larger than 50MB can be sent via Files Transfer. Alternatively, email DWER to make other arrangements.	le
A full, signed, electronic copy of the application form including all attachments has been submitted via email to info@dwer.wa.gov.au ; OR	×
A signed, electronic copy of the application form has been submitted via email to info@dwer.wa.gov.au and attachments have been submitted via File Transfer, or electronically by other means as arranged with DWER; OR	
A full, signed hard copy has been sent to: APPLICATION SUBMISSIONS Department of Water and Environmental Regulation Locked Bag 10 Joondalup DC WA 6919	

Part 16: Declaration and signature

General

I / We confirm and acknowledge that:

- the information contained in this application is true and correct;
- . If we have legal authority to sign on behalf of the applicant (where authorisation provided);
- I / we have not altered the requirements and instructions set out in this application form;
- I / we have provided a valid email address in Section 2.3 for receipt of correspondence electronically via email from DWER in relation to this application;
- that successful delivery to my / our server constitutes receipt of correspondence sent electronically via email from DWER in relation to this application; and
- I / we have provided a valid postal and/or business address in Section 2.4 for the service of all Part V documents
- giving or causing to be given information that to my knowledge is false or misleading is an offence under s.112
 of the EP Act and may incur a penalty of up to \$100,000.

Publication

1 / We confirm and acknowledge:

- this application (including all attachments apart from the sections identified in Attachment 11) is a public document and may be published;
- marine surveys provided in accordance with Part 5 will be published and used, for the purposes of the IMSA project, in accordance with your declaration made in the Metadata and Licensing Statement;
- all necessary consents for the publication of information have been obtained from third parties;
- information considered exempt from public disclosure has been noted by redaction of a separately provided
 copy of the completed application form and its supporting documentation (in accordance with Part 14), with
 reasons as to why the information should be exempt in accordance with the grounds specified in Schedule 1 to
 the Freedom of Information Act 1992 (WA) being provided in Attachment 11,
- subsequent information provided in relation to this application will be a public document and may be published
 unless written notice has been given to DWER by the applicant, at the time the information is provided, claiming
 that the information is considered exempt from public disclosure; and
- the decision to not publish information will be at the discretion of the CEO of DWER and will be made
 Consisted by the provisions of the Freedom of Information Act 1992 (WA).
