

Purearth Expansion Project

Works Approval Application 22 Aug 2025

Attachment 5 – Other Approvals and Consultation

WA Government

Purearth has undertaken extensive consultation with the WA Government over the expansion project for its composting and soil blending operations at its Woottating facility.

The project is supported by a \$1.52m Waste Organics Infrastructure Grant governed by an agreement between the State of Western Australia and River Nominees Pty Ltd, the Trustee for SP Unit Trust, trading as Purearth.

This application for Works Approval reflects the undertakings made by Purearth in the funding agreement and is consistent with the terms and conditions of that agreement, including the scope, location and schedule for the expansion project.

In the leadup to the preparation of this application for Works Approval, a preliminary meeting was held with DWER on 14 May 2025 to discuss plans for the project.

LGA - Shire of Northam

Discussions have been held with the Shire of Northam regarding the expansion project. The Shire is supportive of the project and has advised that the scope of the project will not require a fresh development approval; rather, the existing development approval for the site can be amended on receipt of a letter from Purearth, to provide for the construction of the shed and installation of the weighbridge, biochar plant and processing equipment.
