## 1. Decision summary

The Delegated Officer has determined to make amendments to Licence L9121/2018/1. The amendments are administrative in nature therefore they do not alter the risk profile of the Premises, providing that activities, emissions and receptors as stated in existing approvals remain unchanged.

This Amendment Report documents the amendments made pursuant to section 59 and 59(B) of the *Environmental Protection Act 1986* (EP Act).

The decision report for the Existing Licence will remain on the department's website for future reference and will act as a record of the department's decision making.

## 2. Scope of assessment

### 2.1 Regulatory framework

In amending the licence, the department has considered and given due regard to its Regulatory Framework and relevant policy documents which are available at <https://dwer.wa.gov.au/regulatory-documents>.

### 2.2 Amendment summary

Licence L9121/2018/1 is held by Boral Resources (W.A.) Ltd for the Boral Orange Grove Quarry (the Premises), located at 15 Stephenson Street, Orange Grove.

Activities associated with the crushing and screening of hard rock and the crushing of building material occur at the premises (Categories 12 and 13). The premises also is authorised as a solid waste facility under Category 61A.

In July 2020, the Government announced a package of regulatory reforms to streamline approval processes and to aid economic recovery post COVID-19. With these reforms, the CEO implemented an administrative renewal process to fast-track the renewals for licences determined to be lower risk.

This work has reduced timeframes of assessments however, the CEO proposed to streamline the process further. Where identified as being appropriate to action, the department is extending the duration of licences that are due to expire up to 30 June 2026 (amend to extend). This licence has been identified as a licence suitable to process as an administrative extension to the licence duration.

On 28 February 2025, the department initiated an amendment to Licence L9121/2018/1. The amendment is limited to extending licence expiry date by 5 years; renumbering of conditions, updating conditions to the current format (including removal of redundant conditions and updating wording) and the updating/deletions/inclusion of definitions.

## 3. Consultation

The Licence Holder was provided with the draft Amendment Report on 11 June 2025. On 18 June 2025 the Licence Holder waived the comment period and had no comments.

## 4. Conclusion

Based on the assessment in this Amendment Report, the Delegated Officer has determined that an amended licence will be granted, subject to conditions commensurate with the determined controls and necessary for administration and reporting requirements.

### 4.1 Summary of amendments

Table 1 below provides a summary of the proposed amendments and will act as a record of implemented changes. All proposed changes have been incorporated into the Revised licence as part of the amendment process.

**Table 1: Summary of licence amendments**

Condition no.	Proposed amendments
Duration	Extended to 03/07/2030.
Contents	Deleted as old format
Introduction	Deleted. This guidance is available in the department's Guideline: Industry Regulation Guide to Licensing (June 2019).
History	Updated to include this amendment
General (Conditions 1.1.1 to 1.1.4)	Deleted and replace with new interpretation section. Definitions moved to end of conditions
Conditions 1.2.1 to 2.3.1	Updated Condition numbers and Table numbers. Condition wording remains the same with the exception of replacing 'licensee' with 'licence holder' and adding reference to Figure 1 into tables 5, 12 and 13
Condition 3.1.1-3.2.1 "General monitoring", "Monitoring of inputs and outputs"	Removed headings "General monitoring" and "Monitoring of inputs and outputs" Updated condition and table numbers (conditions 9-11)
Condition 3.3.1 "Ambient monitoring"	Changed to "Ambient Air Quality", updated condition number (condition 12)
Condition 3.4.1 "Noise/Vibration"	Updated condition number (condition 13)
Conditions 4.1.1, 4.1.2 and 4.1.4 "Records"	Conditions removed and replaced with conditions 14 to 16. Intent of conditions remain the same, however wording updated to current format.
Condition 4.1.3 AACR	Condition replaced with condition 17 - new condition wording format. Due date for AACR updated to 1 March as per 'Notice of amendment and schedule of licences with amended reporting conditions' granted 16/5/2022
Condition 4.2.1 – Environmental report	Condition replaced with condition 18 which is in new condition wording format.  Due date for environmental report updated to biennial as per 'Notice of amendment and schedule of licences with amended reporting conditions' granted 16/5/2022.  Due date also modified to align with the due date of the AACR. It is noted that the due date for the annual report in the notice of amendment was 31/12/2023 and biennial thereafter. As this date is exactly the end of the annual period the due date for the report is difficult to achieve. Therefore, an additional 3 months (1 March) has been granted to allow time for preparation of the report. The next due date should have been 31/12/2025 and therefore the new due date is now

Condition no.	Proposed amendments
	1/3/2026 and biennial thereafter.
Condition 4.2.2	Updated condition number (condition 19). Wording modified to refer to environmental report.
Condition 4.2.3	Updated condition number (condition 20)
Condition 4.3.1	Updated condition number (condition 20). Reference to N1 form removed as this is no longer consistent with current licence format. New wording added to table outlining requirements of notification.
Definitions	Definitions updated: Act, Annual Audit Compliance Report CEO, controlled waste, Department, inert waste type 1, licence, licence holder and premises.
Schedule 2 "Reporting and notification forms"	Removed as considered redundant, forms available on DWER website
