4.1 Summary of amendments	4

1. Decision summary

The Delegated Officer has determined to make amendments to Works Approval W6610/2021/1. The amendments are administrative in nature therefore they do not alter the risk profile of the premises, providing that activities, emissions and receptors as stated in existing approvals remain unchanged.

This Amendment Report documents the amendments made pursuant to section 59 and 59(B) of the *Environmental Protection Act 1986* (EP Act).

The decision report for the existing works approval will remain on the department's website for future reference and will act as a record of the department's decision making.

2. Scope of assessment

2.1 Regulatory framework

In amending the works approval, the department has considered and given due regard to its Regulatory Framework and relevant policy documents which are available at <https://dwer.wa.gov.au/regulatory-documents>.

2.2 Application summary

Works Approval W6610/2021/1 is held by Nationwide Oil Pty Ltd (Works Approval Holder) for the Nationwide Oil Maddington facility (the premises), located at 280 Kenwick Road, Maddington.

The premises relates to the categories and the assessed design capacity under Schedule 1 of the Environmental Protection Regulations 1987 (EP Regulations) which are defined in existing Works Approval W6610/2021/1.

On 11 July 2023, the Works Approval Holder submitted an application to the department to amend Works Approval W6610/2021/1 under section 59B of the EP Act. The amendment is limited only to changing the time limited operations period to cease on 27 November 2023, rather than 180 calendar days after the submission of the relevant environmental compliance report.

The change is being sought due to works at the premises having been completed in two stages, with two compliance reports being submitted. This resulted in the end date for time-limited operations for some infrastructure being misaligned, with the period ending earlier for works that were reported in the first environmental compliance report. Changing the period to cease on 27 November 2023 will align the end date for all infrastructure and is 180 calendar days after the submission of the second environmental compliance report.

3. Consultation

The Works Approval Holder was provided with the draft Amendment Report on 10 August 2023. On 21 August 2023 the Works Approval Holder waived the comment period.

4. Conclusion

Based on the assessment in this Amendment Report, the Delegated Officer has determined that an amended works approval will be granted, subject to conditions commensurate with the determined controls and necessary for administration and reporting requirements.

4.1 Summary of amendments

Table 1 below provides a summary of the proposed amendments and will act as a record of implemented changes. All proposed changes have been incorporated into the revised works approval as part of the amendment process.

Table 1: Summary of works approval amendments

Condition no.	Proposed amendments
Condition 5(a)	for a period not exceeding 180 calendar days from the day the works approval holder meets the requirements of condition 4 for that item of infrastructure until 27 November 2023;
