## 1. Decision summary

The Delegated Officer has determined to make amendments to Licence L9034/2017/1. The amendments are administrative in nature therefore they do not alter the risk profile of the Premises, providing that activities, emissions and receptors as stated in existing approvals remain unchanged.

This Amendment Report documents the amendments made pursuant to section 59 and 59(B) of the *Environmental Protection Act 1986* (EP Act).

## 2. Scope of assessment

### 2.1 Regulatory framework

In amending the licence, the department has considered and given due regard to its Regulatory Framework and relevant policy documents which are available at <https://dwer.wa.gov.au/regulatory-documents>.

### 2.2 Application summary

Licence L9034/2017/1 is held by Water Corporation (Licence Holder) for the Advanced Water Recycling Plant (the Premises), located at Ocean Reef Road, CRAIGIE WA 6025.

The Premises relates to the categories and the assessed design capacity under Schedule 1 of the *Environmental Protection Regulations 1987* (EP Regulations) which are defined in existing Licence L9034/2017/1.

On 24 June 2025, the Licence Holder submitted an application to the department to amend Licence L9034/2017/1 under section 59B of the *Environmental Protection Act 1986* (EP Act). The amendment is limited only to updating the Annual Environment Report submission date, revising the Annual Period and changing the Advanced Water Recycling Plant reject water outflow determining method.

Previously, the reject waste disposal volume was calculated using the sum of individual waste flows from each component in the AWRP and from the Beenyup Ocean Outfall meter. The Licence Holder applied to change this methodology to using the plant inflow volume minus the volume recharged at the recharge bores. The Delegated Officer has reviewed this change with consideration to operations of plant infrastructure and determined that the proposed change will not materially impact results obtained, and that using this methodology will result in the same outcome as the previous methodology.

## 3. Consultation

On 30 September 2025 the Licence Holder waived the comment period.

## 4. Conclusion

Based on the assessment in this Amendment Report, the Delegated Officer has determined that an amended licence will be granted, subject to conditions commensurate with the determined controls and necessary for administration and reporting requirements.

### 4.1 Summary of amendments

Table 1 below provides a summary of the proposed amendments and will act as a record of implemented changes. All proposed changes have been incorporated into the Revised licence as part of the amendment process.

**Table 1: Summary of licence amendments**
