2. Overview of premises

2.1 Classification of Premises

Category	Description	Assessed production or design capacity or throughput
62	Solid waste depot – premises on which waste is stored or sorted pending final disposal or re-use.	7,500 tonnes per annual period

2.2 Description of proposed activity

The Licence Holder submitted an amendment application on 20 January 2019 to correct an administrative typographical error from a previous amendment and to note that the site has been classified under the *Contaminated Sites Act 2003* (ID69338). The Licence Holder also requested changes to the previous Decision Report, which was beyond the scope of an amendment, and requested some changes to wording of the Licence conditions. Further discussion with the Licence Holder clarified these potential changes and the Licence Holder confirmed the proposed amendment was limited to administrative changes.

This amendment application comprises two administrative changes:

1. It corrects a typographical error in the Existing Licence Table 1.3.2 where “vehicle batteries” is referenced. The word “vehicle” was approved for removal during an amendment granted in 2015 however this error had been overlooked.
2. It also now includes the current expiry date of 9 February 2028 which previously was listed in the *Notice of amendment of licence expiry dates -Section 59B(9) and Section 59(1)(k) Environmental Protection Act 1986 - Licences Prescribed Premises*.

As the amendments do not alter the risk profile for the Premises, a risk assessment is not required.

The table below lists the documents submitted during the assessment process.

Document/information description	Date received
Amendment application (DWER Reference A1760517)	30 January 2019
Response to request for further information (DWER Reference A1783461)	23 April 2019

3. Conclusion

It has been determined that the licence amendment will be granted subject to conditions commensurate with the determined controls and necessary for administration and reporting requirements.
